

# Windscreen wiper blades

## PRODUCT ADVANTAGES

RESISTANCE  
TO EXTREME  
CONDITIONS

**-30°**

WIPER PERFORMANCE

**10/10** Like premiums

- *With a longer service life, Eurorepar windscreen wiper blades are manufactured from synthetic rubber which has undergone an integrated treatment ensuring enhanced blade protection*
- *New tools : displays (ground level) : 1 empty metal display and a cardboard display composed of a selection of 30 AV brooms*

With a range of **63 references covering an average of more than 96% of the vehicles on the road in Europe**, the range of Eurorepar wiper blades has been developed to offer you the highest possible level of satisfaction.

The quality of a wiper blade is measured in terms of **wiper performance, blade life and resistance** to bad weather.

To ensure the best possible value-for-money, **our wiper blades are tested by means of a very strict protocol.**

## TECHNICAL CHARACTERISTICS

There are **three types of wiper blade**:

- traditional (front and rear),
- flat (front and rear),
- hybrid (front)

## CONDITIONS FOR REPLACEMENT

- Recommendation to change FRONT and REAR wiper blades once a year and, in the case of FRONT wipers, always in pairs.
- Wiper blades in bad condition is a **criterion for a follow-up inspection during an MOT test.**
- Wiper wear is generally characterised by: marks left on the windscreen and noises (whistling / juddering, etc.) when using the wipers.

## REGULATIONS

- ISO 9001, ISO/TS 16949, ISO 14001 and OHSAS 18001 certifications.

## AND

Two PRESENTATION STANDS:

- counter presentation stand for 18 rear wiper blades
- free-standing presentation stand for 30 front wiper blades

## DID YOU KNOW?

Wiper blades often represent an additional sale during a visit to the workshop. Remember to check them with your customer when inspecting his vehicle.

Our parts are guaranteed for **2 years\***

Avoids any risk to fake parts and guarantees their quality.

[www.eurorepar.com](http://www.eurorepar.com)

Our parts are guaranteed 2 years\* against any manufacturing or material defect\*\*.

(\*) For Citroen, DS, Peugeot, Euro Repair Car Service repair networks: the warranty runs for 2 years, parts AND labour included.

(\*\*) For the conditions of application, contact your dealer.

## WIPER PERFORMANCE

Wiper performance is evaluated using visual tests conducted in a real situation.

The **aim of these tests is to identify any streaks or film of water** remaining on the windscreen after each wipe cycle.

A score of between 0 and 10 is awarded according to the size of these marks (10 being the best score = no marks on the windscreen).

**Eurorepar windscreen wipers display a very good performance. No mark is detected during wiping: no streaks or film of water.**

### DID YOU KNOW?

The design is also important!

Our windscreen wipers are very discreet and ensure that a wide field of vision is maintained.

Type de protection	Concurrent 1 premium	Concurrent 2 MDD	 EUROREPAR
Côté conducteur 600mm	10	8	10
Côté passager 450mm	10	2	10

## BLADE LIFE

The quality of the rubber is a key element in windscreen wiper blades. This rubber undergoes treatment in order to protect it over time.

- Either the treatment (coating) is incorporated into the rubber when it is manufactured,
- Or it is applied to the blade as a protective varnish.

In the case of a "coating" treatment, the friction is reduced so the longevity of the blade is improved.

**All our windscreen wipers undergo an integrated treatment providing them with:**

- **longer blade protection,**
- **an extended blade life.**

### DID YOU KNOW?

Our wiper blades are manufactured from synthetic rubber. Unlike natural rubber, synthetic rubber is much longer lasting.

Traitement « coating »

Traitement graphitage

### DID YOU KNOW?

The "coating" treatment does not leave marks on the fingers, unlike the graphitizing treatment.
